## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/SE 2002/00656

**Box No. V** Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

## 1. Statement

Novelty (N)	Claims	<u>1-17</u>	YES
	Claims		NO
Inventive step (IS)	Claims	<u>1-17</u>	YES
	Claims		NO
Industrial applicability (IA)	Claims	<u>1-17</u>	YES
	Claims		NO

## 2. Citations and explanations (Rule 70.7)

Cited documents:

D1 Abstract of JP 03214534 A and figures in JP 03214534 A  
D2 Abstract of JP 03263729 A and figures in JP 03263729 A  
D3 US 5084691 A  
D4 US 4124825 A

D1 (see the figures) discloses a fuse-relay including a first pole and a second pole, a blade spring held in an elastically deformed position by a fuse when the fuse is whole and arranged to make a connection between the first pole and the second pole when the fuse is blown. The fuse is arranged to be blown when a sufficiently high current is sent between a third pole and a fourth pole (insulated from the first and the second pole). D2 (see the figures) shows a similar device with an indicator, indicating if the fuse is whole or blown.

D4 and D5 disclose similar devices comprising coil springs arranged to be stretched when the fuse is whole and released to break a connection between a switch contact and a first pole and a second pole when the fuse is blown.

None of the documents shows thus use of a fuse relay according to the new claims 1-17 (22.01.2004) in a cross-connect (with the advantages according to the description) and gives no indication that would lead a person skilled in the art to the claimed cross-connect and method for connecting. Therefore, the claimed invention is not obvious to a person skilled in the art.

Accordingly, the invention defined in claims 1-17 is novel and is considered to involve an inventive step. The invention is industrially applicable.

**Box No. VIII** Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

The object of the invention is named fuse-relay in the dependent claims 2-5 instead of cross-connect as in claim 1.
